CALL FOR PAPERS

International Symposium on Transport Network Resilience (INSTR 2026)

15-17 July 2026

Université Gustave Eiffel & ENTPE, Lyon, FRANCE

This Symposium brings together researchers, practitioners, and policymakers to advance theory and practice in transport network resilience, reliability, robustness, and uncertainty modeling, across all transport modes. This 10th edition also highlights emerging challenges linked to AI applications, cybersecurity, and connected, automated, and electric mobility systems. We invite contributions aligned with the following thematic pillars.

1. Network Resilience Modeling and Analysis

- Network reliability and resilience modeling and estimation
- Network interdependencies
- Stochastic and robust optimization
- Agent-based and scenario-based assessments
- Mobility data analytics and uncertainty quantification

2. Design and Management of Resilient Transport Systems

- Design and control of resilient transport networks
- Reliability of public transport and intermodal systems
- Travel behavior under uncertainty
- Economics and valuation of resilience
- Evacuation planning and crisis logistics

3. Emerging Technologies and Vulnerabilities

- Resilience of connected, automated, and electric vehicle systems
- Artificial Intelligence for resilient mobility systems
- Cybersecurity and digital infrastructure vulnerabilities
- Freight resilience and supply chain risk
- Robustness of smart mobility systems

4. Risk Assessment and Crisis Management

- Vulnerability assessment and risk analysis
 - Disaster response and emergency transportation planning
 - Climate adaptation in transport systems
 - Multi-hazard resilience planning
 - Poly-crisis management, mitigation, recovery, and restoration strategies
-

HOW TO PARTICIPATE

- 1. Attend the symposium:** please register via the official registration portal: <https://wd.cborg.info/INSTR2026> (linked from the INSTR “Registration” page).
- 2. Deliver an oral presentation:** Researchers may submit any complete, original, and unpublished research papers. To participate, please submit an **extended abstract in English (max 2,500 words)** in PDF or Word, using the official templates, through the Sciencesconf submission workflow (account creation, then “My Submissions”). <https://instr2026.sciencesconf.org/>

All submissions are peer-reviewed by the International Scientific Committee and the Local Organizing Committee.

DEADLINES

- **February 15, 2026.** Extended abstract submission (max 2,500 words)
 - **March 31, 2026.** Acceptance notification
 - **April 30, 2026.** Final or revised extended abstracts due
 - **May 31, 2026.** Early-bird registration deadline
 - **July 15–17, 2026.** INSTR 2026 in Lyon, France
-
